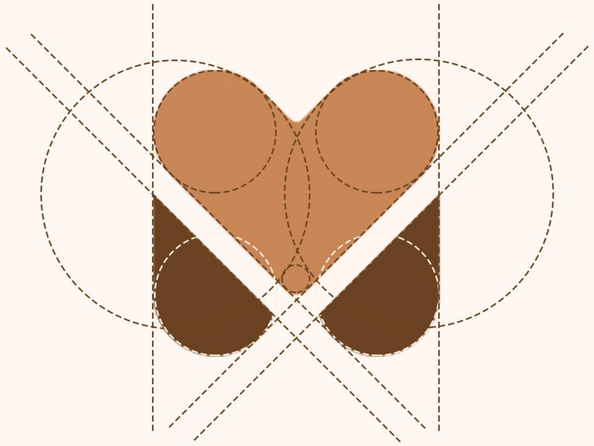
OUR **BRAND STORY**

About Brand

A mother's kitchen in its rawest centre has nothing do with boastfulness, pride and snobbishness. It's all about bringing love to food, and food to love. And about innate talents, patience, culinary inheritance, age-old golden tips and tricks. About the love that is a variable and not an absolute, the kind that believes in nurturing rather than concluding.



Colors are inspired by untouched beauty of homely kichens where all delicious things happen :)

Why **brown**?

The idea behind choosing them. Earthy tones depict the essence of our Mother Earth, the mother that lends us crops, greens, shrubs and all things miraculous. Hence, the earthy tones you chose beautifully communicate the grounded, graceful, divine and adventurous beauty of that of a soulful kitchen.

Color "Brown" is a sense of strength and reliability.
It is often seen as solid, much like the earth, and it's a color often associated with resilience, warmth, comfort, dependability, security, and safety. We humans are grounded to this color which is everywhere in nature – trees, animals and soil!
